Customer Journey Map: EV Fleet & Strategic Intelligence

Date: 31 January 2026	**Team ID:**
Project: Global Electric Vehicle Market Performance Analysis	**Institution:** Medi-Caps University

Phase of Journey	Stage 1: Discovery & Acquisition	Stage 2: Benchmarking & Analysis	Stage 3: Decision & Fleet Rollout
Actions What does the user do?	• Ingests 200k raw telemetry rows. • Connects Snowflake staging tables. • Reviews global KPI counters.	• Filters by Manufacturer and Region. • Compares NMC vs LFP battery specs. • Analyzes customer rating benchmarks.	• Finalizes procurement bids. • Validates 5-year battery warranties. • Deploys vehicles to corporate hubs.
Touchpoints Where do they interact?	• Snowflake Staging Warehouse. • Raw Excel Telemetry Files. • Flask Web Portal Landing Page.	• Tableau Executive Dashboard. • Interactive Slicers and Filters. • 10-Scene Strategic Story.	• Executive PDF Report Export. • RESTful JSON Telemetry API. • Corporate Fleet Management System.
User Thoughts What are they thinking?	'Which manufacturers have reliable market volume and verified specifications?'	'Is LFP chemistry safe and durable enough for high-utilization commercial delivery?'	'We now have verified empirical evidence to substantiate our multi-million procurement.'
User Feelings How do they feel?	Overwhelmed by messy, fragmented automotive datasets across multiple formats.	Empowered and analytically agile through instant sub-second visual slicing.	Confident, strategically secure, and aligned with corporate ESG mandates.
Ownership Who leads this stage?	Data Engineering Team & Database Administrator	Senior Business Analyst & BI Developer	Chief Operating Officer & Fleet Strategy Director
Opportunities How to improve?	Automate schema validation and ingestion pipelines via Snowflake Tasks.	Embed real-time weather and temperature telemetry to simulate winter range loss.	Integrate predictive ML maintenance alerts directly into the Flask dashboard.
